

INSTRUCTIONS ON HOW TO CONNECT TO NHJBGUEST NETWORK

- On your laptop or device, search for available wireless networks
- Find the **NHJBGUEST** network, right click and select “**Connect**”.

- Most devices will then auto direct you to the Agreement Splash Page which will load in a web browser (Internet Explorer, Google Chrome, Firefox)

- When prompted, please read and **Accept** the User Agreement. Without accepting this agreement, you will not be granted internet access. Please wait a couple minutes for the splash page to pop-up

NOTE: IF you have already right clicked the network and selected connect for the **NHJBGUEST** network and the acceptance page does NOT appear, the page can be manually forced:

Open a web browser (Internet Explorer, Google Chrome, Firefox) and type this in the address bar: <http://1.1.1.1>. *This manual redirection will only work if the device does not have another internet connection. If a user has a cellular data connection, this will not work, the cellular data connection should be disconnected before attempting this.*
